PRODUCT DATA

Details	Push-Pin Machine
Speed	0.8-1.2 sec/clip
Clip-to-Clip tolerance	1mm
# of shape supported	To be validated
Accept variation	Yes
End-Cut/1st hole	1mm
Total length tolerance for 4000mm	<5mm
Color of clips	Infinity

PUSH-PIN MACHINE

The Push Pin Machine is designed to insert pins and cut weather strip lengths with precision just like the Insert Clip Machine. Instead of using Canoe type clips, the push pin use instead push through clips.
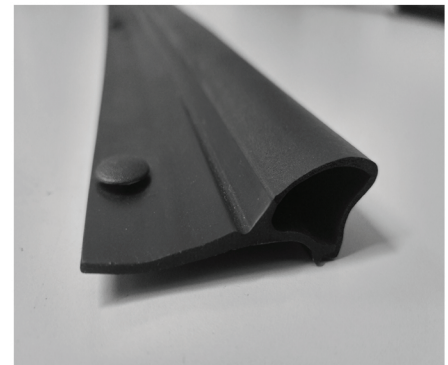

FEATURES OF THE MACHINE

Options

▶ Universal turntable
▶ Automated loading system for precut material
▶ Notch unit
▶ Interchangeable profile-specific tooling for various shape
▶ Automatic scaling of profile variation

Flexibility

Our technology allows our customers more latitude when it comes to extrusion variation. Our machine accepts variation in the geometry of the extrusion, even with a profile that goes from one extreme tolerance to the other within a few meters.

Versatility

You want to run another program with the same clips? By changing or adding a couple of guides, the profile-specific puller, and the recipes, our machine concept allows you to run an almost infinite number of cross sections in a matter of minutes.
