

SLUG MACHINE

WE BUILD MACHINES THAT WORK THE WAY **YOU WISH THEY WOULD.**

The Slug Machine made by Milan Conception is designed to provide all the flexibility Milan Conception's engineering is famous for. All movements are servo driven giving you the possibility to change at any moment the position of the buttoneer as well as the slug. The quick change tooling system, gives you the versatility to run other types of profiles in just few minutes. To ensure the quality of the production, this machine comes with high resolution cameras that validate the good insertion of the buttonneers.
